

## MODULE 1 • PREPARE DRESS FORM

**Step 1** Begin this lesson by measuring and styletaping the hip at 7" down from below the waist tape. Use your L square resting on the table to help align the style tape as you turn the dress form so that the style tape is parallel to the table top and the floor.

## MODULE 1 • PREPARE DRESS FORM

**Step 2** You will be styletaping all around the form from center front to center front.

## MODULE 2 • EXTRACT MEASUREMENTS

**Step 1** Next we will extract measurements from the dress form to prepare our draping pieces or blocks. For the 2 front pieces measure from the center front waist, at the bottom of the waist tape, to the desired skirt length. For this lesson our skirt length is 23". We will add 4" to the length measurement for the left side skirt block and add 12" to the length for the right side skirt block. Record these measurements.
